

Friday, June 19, 2017 (AMENDED)

Members of the Media and Press (PUBLIC RELEASE)

Does any of this suggest something inappropriate occurred? A city retaining a second law firm to defend itself over a \$100 ticket before its heard in trial?

Convictions under multiple aliases, dates of birth and evidencing an additional SSN!

Before their contracted prosecution provided the long-withheld disclosure-- withheld in a justice Court?

A second law firm put into place before the first law firms ignored duty to disclose had dated to a justice court then evidencing Rule 902 convictions on their witness's known history as a pattern lying to police about insurance identical to this.

A Utah Case in Point of Public Corruption Using Private "For Hire" IT/ Prosecution Scams.

I am writing you today seeking the investigation of Mayor Cherise Woods in the known protection and coverup of facts and information presented here.

These facts are reproducible in any investigation concerning this request to seek an investigation by your council! They are, already provided to the Attorney General's office in this case as Rule 902 documents as court certified dockets of citations, civil cases and records of conviction.

These Rule 902 records as evidence in this requested invitation seeking your own independent investigation—these matters peripherally known to the Utah Attorney General and others—are supported by known, reproducible, evidence as Rule 902 dockets manifesting an irrefutable—disturbing--pattern in the use of multiple aliases, additional dates of birth and SSNs used by at least one of the witnesses who this prosecution proceeded to court with.

As in understood prior to then retaining Smith Hartsvigsen to defend themselves in what occurred even before this matter—a \$100 ticket—was heard in the Utah Third District Court, 2 DECEMBER 2016.

This request for your investigation underscores the Mayor, and this IT-cum-prosecution knew as they proceeded to an appeal in the District Court over a \$100 matter in their own self-preservation.

It evidenced their own prosecution witnesses whom they had immunized in a known pattern, a known methodology of how documented fraud is committed using aliases, multiple dates of birth and alternate SSNs. It's the stuff of the Innocence Project—corruption and indifference!

Critically—these parties—themselves understood, knew and proceeded anyway with all you're about to read. It had evidenced under their own, long withheld disclosures only turned over during an appeal of a traffic ticket and —one month before that re-trial. A known factual withholding by sheer indifference, or negligence, or by intent—disclosure on their own witness with this same pattern.

- Disclosure as the partially disclosed records of conviction(s) on one witness disclosed on 28 October 2016—one month before a 2 December 2016 retrial—records of conviction falsifying insurance and license information to police. The exact matter of this same accident scene with the Mayor's brother—officer Taylor and an IT firm was knowingly using as a prosecution witness through two court proceedings that their own witness was driving without insurance the day, as a long-documented pattern, as he ran into me creating permanent injury.
- This same pattern this group then knowingly immunized as the aiding and abetting of criminal activity knowingly covering up their own witnesses patterned, evidenced, convictions lying to the police in the matter of insurance. Just as he'd done with immunity and now the blessings of the mayor's brother, Officer Taylor, without any consequence to be given further immunity through two court proceedings.

This is the prosecution witness who'd also told Officer Taylor that day--he was "insured". A prosecution witness who'd without any consequence for any of it described here in this request—factually lied with the blessings of this city and its private IT/prosecution team; given a condoned immunity despite the known pattern under his own previous convictions doing the same as with a sworn Utah peace officer of the SSLCPD, on 18 FEB 2016—and despite permanently injuring another driver as an already disabled veteran.

- This withheld disclosure under the Utah Rules of Criminal Procedure 16, also withheld Brady v. Maryland, 373 U.S. 83 (1963) as landmark United States Supreme Court precedent that established the prosecution must turn over all evidence—the records of conviction withheld in a Justice court.

☆☆The second witness problem is nearly as disturbing. He'd been driving without a license since 2009 with six known citations on a District Court database while a Utah State DMV check on BOTH returned absolutely clean. How is that inconsistency of records not disturbing in this state☆☆

This over the top in your face dereliction of duty screams investigation. This exemplified prosecution used—KNOWINGLY as its two witnesses in a case beginning with both drivers driving illegally that day as just more of many multiple uncontested facts in a case underlying what privately conducted sham prosecution represent in America.

It proceeded a second time to a district court, as an appeal on everything done and withheld in their Justice Court—on the matter of a \$100 infraction supported by the testimony of two

separate witnesses driving illegally that day: one who falsified his insurance to a sworn officer and without insurance a 5th time that day; the other without a driver's license dating to 2009.

This private It/prosecution had become a factual aiding and abetting of known criminal patterns of fraudulent activity and behaviors associative of documented fraud. A prosecution and a city it contracted to also sanctioned by the South Salt Lake City police force and its relationship to this IT/prosecution firm that had then provided immunity—in all of it--to these Foreign National used as tools to prosecute a veteran under their own usage of documented document fraud they themselves withheld then eventually disclosed after a second firm was in place while they—immunized those involved—in the prosecution of others.

Their prosecution witness colliding into me had admitted this under oath (attached audio)—driving without insurance that day—under a known documented pattern driving with four (4) additional insurance citations prior to this 18 FEB 2016 accident. He'd also in another documented pattern-- falsified his insurance status to this Mayor's brother, Officer Taylor, again without any consequence then evidenced on a court record in two separate court proceedings at the cost to the tax payer. **All of it immunized.**

This witness—immunized in falsifying his personal information—as a pattern to a Utah Sworn Peace Officer known under its own disclosure they'd withheld. Done so in their Justice Court—and then a Utah District Court. It had been, on the record just as provided here in attached audio of the justice court. It had also occurred while the same IT/Prosecution was in physical receipt of an original letter from the insurance company letter of denied coverage for the date of accident dated 29 FEB 2016 at that first March 2016 hearing.

- (attached with audio) A denial matching the name of the named insurance company Officer Taylor annotated into this report under his own hand into that postdated accident report.

Even if Taylor and this IT/prosecution firm deny this original in their own possession—there can be no denial of a second denial of coverage document from the State's own insurance database Insure-Rite record on this driver's denied coverage for 18 FEB 2016 then stipulated into evidence--directly through officer Taylor in the second court proceeding into evidence. Yes, the Insure-Rite record provided by Stephen Aina of this IT/prosecution Stephan Aina had stipulated to admit this evidence 2 DEC 2016 submitted through officer Taylor on a witness stand as the prosecution's witness. What kind of cavalier coverup then continued to occur on behalf of a foreign national with a pattern of convictions lying to the police—once again in my accident?

Can anyone not speculate this prosecution witness—who'd falsified his own status to Taylor then Taylor admitting it himself in a Justice court record March 2016 (audio attached)? While

Taylor and the SSLCPD continued to be immunize this known pattern—with a pattern of convictions-- after all this?

They'd immunized perjury additional to previous criminal pattern of conviction using aliases, other dates of birth and another SSN. Even as they headed to a retrial with the Justice court perjures known to this officer and and this private HIT TEAM as an IT/prosecution firm the mayor used on contract.

It had been Taylor previously before re-trial—testifying in a Justice court (audio attached) their witness who falsified information at the time of accident stated to him he was insured after Taylor ALSO failed to obtain physical proof that day and used this witness's accident statements to hold me liable in not just the lies—a continuation of lies and immunity for the continuation covering up a pattern over a decade long. Doing so passing liability with added bonus of permanent injury.

After this was on a record placed into evidence—a stipulated knowledge of the Insure-Rite record -- with the original denial of coverage letter dated 29 FEB 2016 by Freedom National—this target witness sequestered outside the courtroom under Rule 506 exclusion, took the stand and then once again, perjured himself a second time on the matter of insurance without consequence and with immunity. The entire charade? A tax payer subsidized sham lasting a year purported to be all about "Public Safety".

A prosecution who--even before the appeal—witnesses the Mayor and city attorney retaining a second law firm to defend itself from all it understood it had already done.

These types of sham prosecutions are anything but a traffic ticket under the known, condoned patterns of immunized falsifications used as a prosecutions witnesses. This is SS Mayor Cherry seeking re-election as a jumbo-sized house of canards everyone should disdain.

What make believe is the county of Salt Lake, or Utah running here—a suspended system of supposed laws and rules which are knowingly overlooked and suspended in the matter of self-preservation then committed under color of law? This pattern known, condoned, covered up and immunized resulting in another citizen permanent injuries. EVERY consequential act had been given immunity in all of it.

SS MAYOR CHERRY--HOUSE OF CANARDS

Witness (2) was convicted in the same South Salt Lake Justice Court on the citation Taylor gave him-- driving without a license since 2009—then prosecuted by the same IT firm using an alias witness (2) had never used before in seven of his other citations showing a trial of four (4) aliases in total...

four days after he was cited in South Salt Lake—where Taylor let him drive away with the other motorist—witness (2) later obtained a six Citation for driving without ever obtaining a license in **Orem Utah case: 165901470** using a previously used alias he hadn't been prosecuted under by the same prosecution in South Salt Lake—also disclosed as Rule 902 evidence to the prosecution and Smith Hartsvigsen before

more than allegation made formally here today. These parties aided and abetted the disclosed patterns of known, as in known, methodology used here under a decades old pattern of using aliases, alternate dates of birth and SSNs underlying the factual form of how document fraud is committed—by their own prosecution witnesses.

This Utah city stood by this in exchange for testimony from not one—but two--of the same type of people performing these actions. They had become records disclosed—disclosed to law firm TWO as a reproducible documented email trail—their known prosecution tools disclosed history of Rule 902 evidence as a record of their own shambolic process -- even before the appeal was heard in a District Court.

You really of conscience should ask yourselves? Why would a uniformed officer who failed to obtain proof of insurance—then admit such on a witness stand into a record then do nothing to those who would have then—as a pattern also known to him in this case—painfully known—then do nothing about it?

The same witness—then went onto to be ticketed for what is factually the 6th time he driving without insurance and convicted in Murray City in March 2017 in case: 175000687.

Ticketed in a real prosecution, a real city police department under the same color of law these named actors here had covered in the name of self-preservation as indifference to public safety they'd hired a second law firm to defend in the public safety contract of law firm number one!

The attached audio of the record testimony under oath from a South Salt Lake March 2016 hearing clearly evidenced this with respect to the immunity in covering up what was known and aided in a pattern that continued even after this case ended. South Salt Lake Police and IT firm courtcms.Com –is

These actors under color of law under their private contract prosecution IT firm **courtcms.com**, retained a second law firm to defend themselves months before a \$100 ticket was even heard on appeal.

None of that suggests a collusion of king Kong sized impropriety in a prosecution self-assured of a prosecution then needing a second law firm to indemnify the city over how the prosecution was conducted using the witnesses they immunized in all of it to obtain two—separate—convictions doing so?

What began that day as a botched report with a false accident diagram and some good deed under a postdated accident report—despite if it had been done intentionally or by sheer lazy indifference as a sworn officer—then proceeded a step by step callous cover up of known problems and practices of a fraudulent prosecution using criminal witnesses immunized in their own decade known pattern of driving illegally and using aliases to falsify information to the police as a record reproduced under their own disclosure and Rule 902 documents given to this second law firm.

A private prosecution previously not providing Brady disclosure until one (1) month before retrial in their own email trail of October 28th, 2016. Hiding and withholding a known, beyond substantiation of evidence in their own emailed disclosures now known to the to the Utah Attorney General's office who has failed to act for its own political reasons.

This storyline? It's the history of committing fraud upon the courts, fraud with sworn officers of the courts and law and a fraud anywhere else policies permit unabated and without consequence!

It haunts the conscience to think—**excuse me—to know**—no one is concerned of a quid pro quo exchange of testimony from two undocumented people with a history of falsifying insurance and license information under their own pattern of known citations—who are shown to be criminally altering names and dates of birth in a pattern of Rule 902 citations and convictions everyone including these courts in Utah are painfully aware of!

I'd long been a blogger and writer in this state when I returned from Afghanistan and Iraq. Blogging about what I called a rule of louses circumventing the rule of law as their own protected political expediency.

This case bar none now in the first person--evidences those here under color of law standing idly by why other US citizens anywhere—whether any of you god damned dislike that person, misunderstood their writing, or don't support the beliefs or political ideology that US

Citizens come first in line—then becomes permanently injured to then be sanitized in some sanitized clan Clampett house of canards.

How Is This Not the Aiding and Abetting of Criminal Activity and Behavior?

- Known perjuries by both witnesses supporting a precedent of this city and prosecution sham.
- Given a pass in lying—not just in this sham prosecution knowing this—it had been and continues to be condoned in a more than evidenced decade plus pattern they'd both sanctioned and attempted to rewrite the histories of in their own databases!
- Less than mediocre leadership who'd condoned, even before then immunizing and covering up injury to others under a fake humanity as self-aggrandizing policy from bankrupt leadership.

To be infuriatingly denied—as a veteran—as someone paying their own way into places this same bankrupt leadership was busy talking smack about while the dead were dropped on Dover Air Field as these baboons swilled fake humanity and their Starbucks.

It's a case of just wanting to make and pass the laws others had been subjected to—it's a case of giving yourselves exemptions from the same constitutional rights and responsibilities as arbitrary and capricious.

The failure to disclose predicated upon a quid pro quo of this own's prosecution's puppet, Stephan Aina, concerning a Rule 11 sanctions motion that when withdrawn -- *then and only then* provides what they had known and failed to disclose until 28 OCTOBER 2016 one month before a trial de novo under a record of law here to lazy and indifferent to provide or offer substantive or due process to the litigants in its own courts.

*Denied even basic principles as sanctity of The **Equal Protection** Clause as well-known established in force and effect Fourteenth Amendment.*

Doing so in some backwater clan-Clampetland despite a Constitution broader and wider than this backwater city, any county or any single state.

One they'd backed under known pattern concerning the methods used in document fraud bankrupt leadership sanctions and condones.

The uncontested record of this appeal underpinning a bankrupt leadership's sham prosecution endured!

If the rest of this just seems like a rehash to you, imagine how damningly irritating and frustrating it is to me. The one with the permanent injury paying for the bankrupt leadership here.

The one who is a veteran; the one who went through it; the one who as a *legal* citizen driving legally that day then had two illegal aliens with known, histories, patterned usage of aliases used as witnesses by a sham IT firm doing a private prosecution for who?

The one enduring this patently false prosecution because of some possible side arrangement between one of these illegals committing document fraud as a known and convicted pattern a falsifying information concerning insurance and his license and identity to the police before doing so once again--a 4th time in all this which was then immunized, sanctioned and condoned. Or the possible coverup for incompetence? Or the possibility of this IT firm, running the software backend—was needed to do someone a favor using two foreign nationals diving illegally that day—driving with a history of driving illegally—a history of aliases, convictions and everything else here.

The rest of this letter? A partial recap of details you may not be aware of.

■■ *They as fact beyond any reasonable doubt threshold based upon reproducible evidence in a criminal court—had colluded, covered up, sanitized and immunized a prosecution and its witnesses known patterns of criminal behavior presented it a Justice and District Court as credible. A prosecution representing a prosecution rooted in document fraud. One more than quite possibly adding the specter of another document fraud entered into a Justice Court record! ■■*

All emails and documents of this shambolic prosecution available upon request!

Accident Report Anomalies:

1. The accident occurred on 18 FEB 2016. Taylor postdated to the following day as 19 FEB 2016
2. The accident report shows that Bautista's insurance coverage is reported to start on 18 FEB 2016—though no proof was rendered or provided at the scene.
3. This postdated accident report of Officer Taylor? I reported I had been injured, documenting it on the accident investigation report. Taylor then in that postdated report—indicted I was “not injured” contrary to a witness statement in the same report.
4. The accident diagram was knowingly incorrect—which Taylor refused to amend—despite this prosecutions own witness driving without insurance that day—stating he had begun at a stop light nearly 330 feet further south of where Taylor placed him in the diagram.
5. Taylor placed me in a lane of travel to the furthest left side of traffic--I was not in—though I had just exited behind traffic from the Techna Auto Glass in the outermost right lane of traffic—a business located at the west corner by the overpass.
6. A lawful GRAMA response from the city of South Salt Lake provided an email from Brad Mumford wherein states as a record of this problem”

“As already indicated to you, the diagram in the report is not intended to be an exact replication of the accident, but is merely to aid in conceptualizing the points of impact. As such the police department will not be making any changes to the report”

CMS has been operating for more than 15 years in Utah and recently was incorporated as a limited liability company by attorneys Chad L. Woolley and Tracy S. Cowdell, partners in the Utah law firm Cowdell & Woolley PC. Case Management Systems was organized, with Chad and Tracy as owners and member-managers, to provide computer systems and software for use by prosecutors, attorneys and courts. CMS develops and oversees development of systems and software, licenses the Case Management Systems product that attorneys have been using since the late 1990s, and contracts with outside agencies for its use.

Case Management Systems has licensed its product to Midvale City for use by its municipal prosecutor and city attorney. The Cowdell & Woolley law firm, including 11 attorneys and a dozen support staff members, also use the product daily. Cowdell & Woolley attorneys say they would be “lost without it.” The system is accessible to court clerks and police officials in all 12 of the legal agencies that Cowdell & Woolley PC serves, allowing for more than 100 concurrent users. Cowdell & Woolley’s clients include Taylorsville City, South Salt Lake City, Midvale, Draper, Moab, Herriman, Daggett County, and several cities in Sanpete County. Cowdell & Woolley prosecutes approximately 5,000 cases in the justice courts per month (over 60,000 cases annually).

Chad L. Woolley

CMS owner and developer Chad Woolley is an expert in information technology and software engineering. Before receiving his juris doctorate from Brigham Young University’s J. Reuben Clark Law School, Chad completed his undergraduate work in computer systems, earning a bachelor’s of science degree in design engineering technology from BYU. After graduating, he founded his own computer company, Advanced IT Solutions Inc., with a customer base of more than 50 companies. Chad is currently the appointed County Attorney for Daggett County and the appointed city attorney for the City of Ephraim.

Tracy S. Cowdell

Cowdell & Woolley partner Tracy Cowdell, who is co-owner of CMS, worked as Chief Operations Officer at Advanced IT Solutions prior to completing his juris doctorate at Brigham Young University’s J. Reuben Clark Law School. For the past 13 years, he has represented governmental entities, practiced criminal law, and represented various private individuals and corporations. Tracy represents Sandy Suburban Improvement District and the South Valley Wastewater Treatment Facility. He is the appointed city attorney for the City of Taylorsville

☆■☆☆ A state getting rid of that seems not to disturb anybody? Could it be owing to the politics overlooking behaviors of its so called elites? That the individuals running this IT/prosecution firm happen to be the current City attorney for Taylorsville and his partner the District Atty for Daggett County. ☆■☆☆

While stalling a pattern of disclosure of conviction on their prosecution Witness, one with multiple aliases and dates of birth and Social Security numbers underlying document fraud—it had been covered up, immunized they'd unequivocally knew going back over a decade in those records of conviction they'd already withheld in the justice court in obtaining a conviction even prior to appeal.

That instead, retained a Second Law Firm. Got them in place for their own self-preservation and indifference to the rules of criminal procedure and constitutionality of disclosure of US Brady and US V Giglio until after retention of that second law firm over this \$100 ticket. How is that not disturbing in the case of a minor traffic infraction?

This prosecution revealed a pattern of protecting somebody who, even after the city and contract prosecution disclosed the records of conviction they, substantiated, withheld all the way back to the Justice Court--becomes a pattern of aiding and abetting Bautista as their witnesses own known pattern in the 28 OCT 2016 disclosure.

Under the same prosecution firm on witness 2, had convicted him in the same Justice Court using one alias--evidenced in Rule 902 given to them and their second law firm before retrial, evidencing how his alternating usage of known Aliases as a naming variation he'd never used until this case, also evidenced under rule 902 records, evidenced a known seven (7) other citations using a total of 4 naming variants as aliases ***not* matching the South Salt Lake Justice Court conviction by the same IT/prosecution firm who quite possible manages that justice courts records!**

☆☆ Used as a witness in my case under one alias--allowed to swear in under a separate alias in my own Justice proceeding different than the same firm had convicted him under in South Salt Lake stemming from his citation with Officer Taylor then filed as a reproducible Rule 902 record into the South Salt Lake City Justice court proving this in spades. ☆☆

The initial witness who had been driving that day without insurance in his own, known pattern of three convictions for lying to the police..., two of these records on the matter of insurance..., and four (4) additional citations for insurance evidencing the document fraud methodology of multiple dates of birth and aliases and SSNs consistent with the current accident and pattern of lying to officer Taylor supporting while they had hired a second law firm for me from before the case went to a retrial.

This pattern of document fraud in the pretext of a prosecution, using these known histories on the record, is what they had hoped to cover up on these two individuals

whom they used to prosecute me in this case!

Undocumented alias using people both driving illegally that day then deemed honest and forthright as "prosecution witnesses" by a private IT firm who had to get a second law firm in place to defend it before they went to the retrial because of all the mistakes they had made over a \$100 infraction. Do you even follow that Agent?

Then not only covered up these things as their own documented pattern evidenced against them in my own accident, that they knew of, as they would eventually disclose what was originally withheld for whatever reasons they had been withheld, while providing immunity to the same people whose own Rule 902 documents evidenced this known decade+ as a pattern manifesting once again in South Salt Lake in February 2016 in my accident. The very same behavior and pattern then covered up with Taylor as

- ...a fourth time as a pattern with respect to falsifying his insurance status to the police;

- ...a fifth (5x) time as a pattern with respect to not being insured
- ...a fifth citation driving without a retaining a license since 2009
- ... being convicted in the same Justice Court on the infraction of driving without a license since 2009 using an alias he had never used before and seven of the citations
- ... the same second witness had four days later obtained a six Citation for driving without ever obtaining a license in Orem Utah **case: 165901470** reverting in that citation to a previously used alias he hadn't been prosecuted under by the same shit prosecution of South Salt Lake!

☆☆ Something like covering up these patterns under the pretext to prosecute US citizens by a private law firm doesn't catch the attention of Utah leadership sworn to uphold the US Constitution? Anyone? ☆☆

This is what they knew even before the case was heard in the district court. It's why they retained a second firm to defend themselves.

Of course they knew these witnesses had lied in both court proceedings about insurance. That's just the small potato here.

It was to cover up the larger pattern of a more than decades known pattern of its own convictions also withheld while seeking a second law firm to defend it all as another rule of louse's abuse of process scam underlying the same sham prosecution.

Evidence in The District Court of insurance evidence from the same prosecution firm that was factually in the record-- placed into evidence directly through Officer Taylor on the witness stand along with three other records of conviction for lying to the police—two of those on insurance just like with Taylor who is now being used to direct the evidence onto the record.

It included this INSURE-RITE master record Stephan Aina the prosecution from had themselves obtained. Insure-Rites own record then substantiating all along that Bautista had not been insured that day despite they'd been provided the original letter from Freedom National Insurance

concerning the denied coverage which they had even before the justice court trial.

They had given immunity for all of it. Most pointedly covering up the methodology of the continued pattern of how document fraud is committed by and documented illegal aliens in this Society.

☆☆ It had been the entire point made under appeal on the record of this case -- why they fought it so viciously at any cost with the hedged bet of a second law firm to continue the abuses this counties policies had supported. ☆☆
